

# TABLE OF CONTENTS

ABSTRACT	i
RESUMO	ii
ACKNOWLEDGEMENTS	iii
LIST OF FIGURES	vi
LIST OF TABLES	vii
LIST OF ACRONYMS AND USED ABBREVIATIONS	viii
1. GENERAL INTRODUCTION	2
2. LITERATURE REVIEW	5
2.1. BIOLOGY AND LIFE HISTORY	5
2.1.1. Taxonomy	5
2.1.2. Morphometric Characters	6
2.1.3. Major Behavioural Characteristics	6
2.1.4. Feeding Habits	7
2.1.5. Sexual Maturity and Spawning	7
2.1.6. Eggs and Embryos	8
2.1.7. Larvae	8
2.2. OVERALL DISTRIBUTION	9
2.2.1. Geographic Distribution	9
2.2.2. Ecological Distribution	9
2.3. PRESENT SITUATION AND TRENDS OF EUROPEAN SEA BASS CULTURE	10
2.3.1. Global Aquaculture Production	10
2.3.2. Historical Background and Main Issues	11
2.3.3. Expansion through Research, Exploitation and Governmental Support	13
2.4. DISEASE AS A PRIMARY CONSTRAINT – ALTERNATIVE AND PREVENTION APPROACHES	13
2.4.1. The Potential Drawbacks Using Antibiotics	13
2.4.2. Alternative Methods	14
2.4.2.1. Probiotics	14
2.5. GNOTOBIOTIC AQUATIC ANIMAL AS A VALUABLE RESEARCH TOOL, TO INVESTIGATE	16
HOST-MICROBIAL RELATIONSHIPS	16
2.5.1. Gnotobiotic Terminology and Criteria	16
2.5.2. Gnotobiology Value	17
2.5.2.1. Gnotobiology Potentials and Limitations	17
2.5.3. Procedures to Obtain and Maintain Gnotobiotic Aquatic Organisms	18

2.5.4. Methods to Verify the Gnotobiotic Status	19
2.5.5. Breakthrough by Using Gnotobiotic Aquatic Animals	23
2.5.5.1. Overview of Studies on Marine and Freshwater Fish	23
<b>3. MATERIALS AND METHODS</b>	<b>27</b>
<i>COMMON GENERAL PROCEDURES</i>	
3.1. Supply of <i>D.labrax</i> Eggs and Rearing Conditions	28
3.2. Chemical Treatments on the <i>D.labrax</i> eggs	28
3.2.1. Glutaraldehyde Disinfection Treatment	29
3.2.2. Glutaraldehyde Disinfection Treatment with further Addition of Antibiotics	29
3.2.3. Iodophor Disinfection Treatment	29
<i>AXENICALLY GROWN SEA BASS LARVAE</i>	
3.3. Hatchability of <i>D.labrax</i> Eggs and Larvae Survival after Disinfection Treatments	30
3.3.1. Hatching Success and Larvae Survival Rate	31
3.4. Effect of Different Chemical Treatments on the Bacterial Load of <i>D.labrax</i> Eggs and Larvae	31
3.4.1. Disinfection Efficiency Tests	31
3.4.2. Methods Used to Verify Axenic State	32
3.5. Morphological Features from <i>D.labrax</i> , Applied to the Study on the Effect of Different Chemical Treatments	33
3.5.1. Fixation Procedures	33
3.5.2. Histomorphological Procedures for Scanning Electron Microscopy	33
3.5.3. Morphometric Measures and Anatomical Observation	34
<i>EVALUATION OF DIFFERENT HOLDING REGIMES ON THE SURVIVAL SATE OF GNOTOBIOTIC SEA BASS LARVAE</i>	
3.6. <i>D.labrax</i> Axenic Larvae	35
3.6.1. Hatching Success	36
3.6.2. Methods Used to Verify Gnotobiotic State	36
3.7. Influence of Rotary Motion Devices on <i>D.labrax</i> Larvae Performance	36
3.7.1. Larvae Survival Rate	37
3.7.2. Efficiency Trial Used to Confirm Gnotobiotic Status	37
3.8. Effect of Different Microbial Strains on Gnotobiotically Grown <i>D.labrax</i> Larvae	37
3.8.1. Axenic Yeast Cultures	37
3.8.2. Bacteria Strains and Growth Conditions	38
3.8.3. Inoculation of the Selected Strains	38
<i>EXPERIMENTS DATA ANALYSIS</i>	
3.9. Statistical Analysis	39

4. RESULTS	41
4.1. AXENICALLY GROWN SEA BASS LARVAE	41
4.1.1. Hatching Success and Larvae Survival after Disinfection Treatments	41
4.1.2. Effect of Different Chemical Treatments on the Bacterial Load of eggs and larvae	42
4.1.3. Surface Disinfection Efficiency	43
4.1.4. Different Chemical Treatments and their Effect on the Morphological Ontogeny of Sea Bass Larvae	44
4.2. EVALUATION OF DIFFERENT HOLDING REGIMES	48
4.2.1. <i>D.labrax</i> Axenic Larvae	48
4.2.2. Influence of Rotary Motion Devices on Larvae Performance	49
4.2.3. Effect of Different Microbial Strains on Gnotobiotically Grown Larvae Performance	50
5. DISCUSSION	53
5.1. AXENICALLY GROWN SEA BASS LARVAE	53
5.1.1. Hatching Success and Larvae Survival after Disinfection Treatments	53
5.1.2. Effect of Different Chemical Treatments on the Bacterial Load of Eggs and Larvae	57
5.1.3. Surface Disinfection Efficiency	60
5.1.4. Different Chemical Treatments and their Effect on the Morphological Ontogeny of Sea Bass Larvae	61
5.2. EVALUATION OF DIFFERENT HOLDING REGIMES	64
5.2.1. <i>D.labrax</i> Axenic Larvae	64
5.2.2. Influence of Rotary Motion Devices on Larvae Performance	65
5.2.3. Effect of Different Microbial Strains on Gnotobiotically Grown Larvae Performance	67
6. GENERAL CONCLUSIONS	70
REFERENCES	72
