Kg feed per 100 kg fish per day

## Recommended use

ALLER PRIMO is developed for medium or intensive catfish farming. Nutrients are easily accessible due to a balanced raw material selection, and this ensures a good performance and growth rate of the fish.

The feed can also be used for carp, sturgeon and trout, when farming conditions require a floating feed.

## Composition

The full composition will appear on the label

Soybean meal, wheat, fish meal, blood meal, rapeseed oil, fish oil, wheat gluten, bean/pea protein concentrate, single cell protein, hydrolysed protein, rapeseed meal and sunflower meal.
